

RotoStorm™

INSULATION BLOWER

Professional Insulation Blower

The portable RotoStorm insulation blower is compact and yet durable, with all steel construction. It features double agitators to assure smooth and accurate fiber conditioning, as well as variable air pressure. With an 18" air lock chamber, it allows high production with smooth delivery. Plus, the blower allows the flexibility to use either cellulose or fiberglass insulation.

The RotoStorm insulation blower will have you started quickly, easily, and professionally, with your insulation installation service offering.
